Seat cushion
Wet wipes
Headlamp/spare batteries
Flashlight
Tow rope for tree stand

We often have extra heater body suits and seat cushions available—please visit with me if you are interested

We provide sleeping bags and pillows on our hunts

When traveling with friends, we suggest to save yourself money with the baggage by having a double rifle case. This will allow for an extra piece of luggage for returning home which could be your rubber-maid tote with antlers/cape

Heat packs, wet wipes, and miscellaneous snacks can be purchased once you are in Canada, as well as a few other loose ends to save on weight for your commercial flight

Take care of your passport—in other words make sure it is up to date and hasn't expired

Anyone whom would like to leave their deer antlers/cape with us for return back to Manitoba taxidermist may do such. Otherwise we will pack in a rubber maid tote for your transportation back home. Often times, hunters will pack this in their luggage, but often times this doesn't fit or will put them overweight on that piece of luggage

The Heater body suits are loved by those that have them. I think they are a great purchase, and be used back home. Several of our return hunters continue to leave them with us as they make annual return trips

WIN forms: Win forms must be filled out and returned to us, even if your WIN card has not expired. We need these applications in order to print your licenses so please return early
